

How to connect your telematics devices with Trucker Tools

Our online telematics onboarding tool makes integrating easy. Follow the step-by-step instructions to get connected today!

Trucker Tools is partnered with 200+ providers so you can automate tracking with your ELD, GPS, or reefer devices.

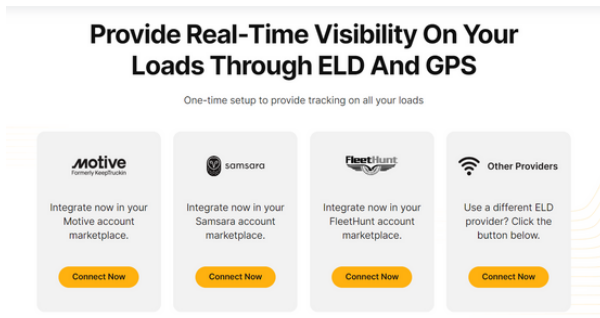

1 Visit our ELD page

Access the telematics page on our website under the "Integrations" tab. Or, click the link below.

<https://www.truckertools.com/eld-carrier-integration/>

Use Motive, Samsara or FleetHunt? Connect instantly through our one-click marketplace.

If using another provider, click Connect Now under "Other Providers", or scroll down to access the integration form.

2 Complete the form for your provider

Select your provider from the dropdown list of Trucker Tools 200+ partnered providers and enter in your company information.

Don't see your provider? Select "Provider not listed" and we'll contact them to add them to our network.

3 What's next?

Depending on your provider's integration requirements, you'll be redirected to a page with instructions on how to connect.

The instructions you may be prompted with, include:

- **An email has been sent to your provider for next steps.** Please keep an eye on your inbox for an email from Trucker Tools to your provider. You may be asked to provide further authorization or information to your provider to proceed.
- **Please enter an API key / credentials / etc. to integrate.** You'll need to be the admin for your telematics account to access and obtain the requested information. Please follow the steps as outlined in the linked guides.
- **An email has been sent to the Trucker Tools team.** The Trucker Tools team may need to send you a legal form to sign or obtain further information, before they can contact your provider to integrate.

4 Your integration is complete!

If you entered your API key / credentials / etc and the information is valid, you'll received a confirmation popup that your integration is completed.

If an email has been sent to your provider or Trucker Tools, please work with their teams on the email thread and they'll let you know once the integration is complete.

Need further assistance?
We're here to help!
